

About Onwave

Onwave was founded in 2011 and consists of 75 full time employees based out of our Kent Headquarters including:

- Account Managers
- Operations
- Technical Support
- Networks Engineers
- Networks Operations
- Full Stack Developers

What We do

Technology

- Satellite enabled geo-location technology including wearable devices
- Geotagging for assets and equipment

Connectivity

- Survey, design, installation & fully managed service provision of complex connectivity solutions
- Site-wide communications
- Technology enablement

Our Technology Solutions

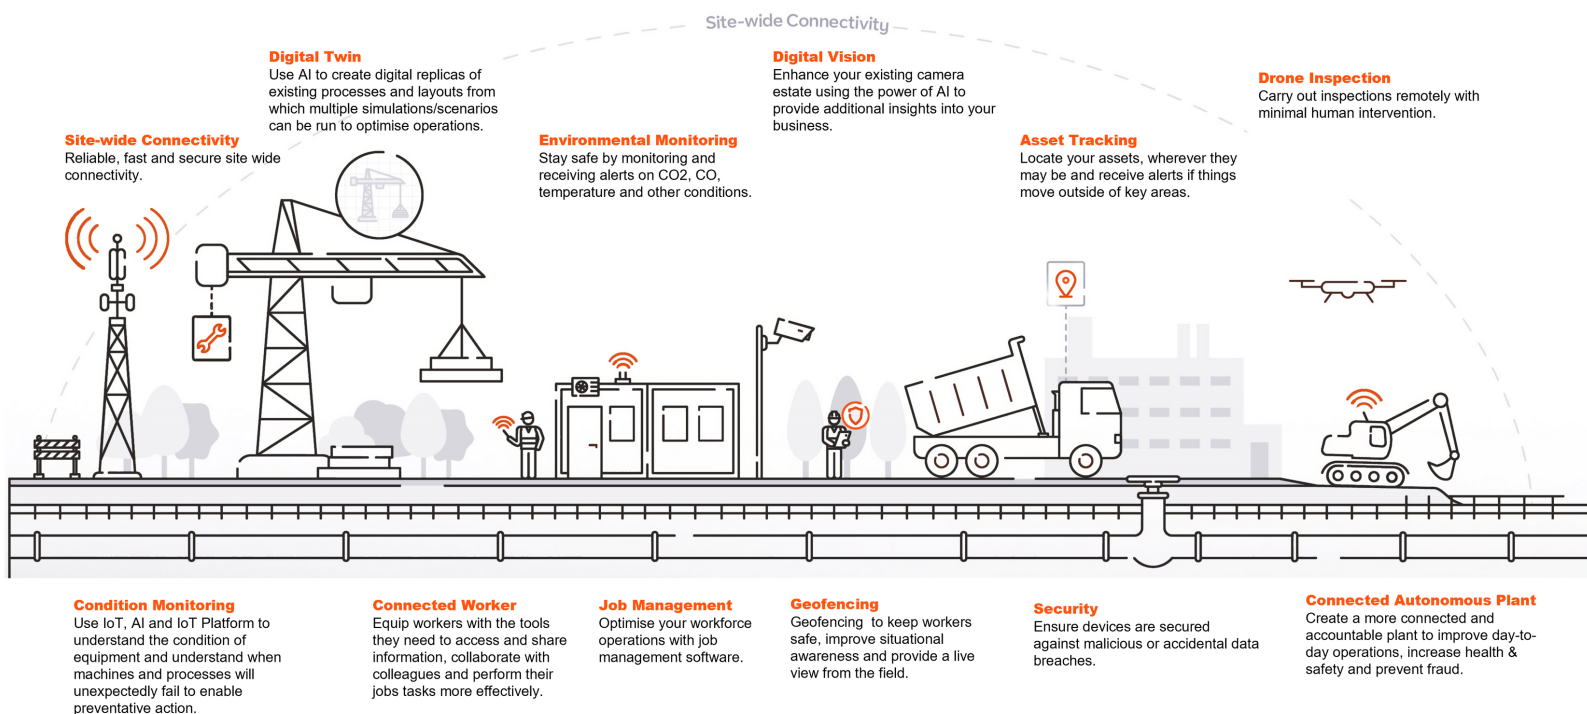

Connectivity

From 5G private networks to satellite solutions, we cover solutions for our clients' needs, technology and digital requirements including

- Fixed fibre
- LEO satellite
- 4G/5G networks
- Portable connectivity solutions
- SD-WAN

We provide:

- Failover and back-up to core connectivity provision
- Fully scalable options
- Cloud connectivity
- Integration with your core systems and platforms
- Rapid deployment

Geofencing Wearables

OWL wearable technology enables accurate location tracking to under 200mm

Safety

- Increased situational awareness
- Reduction in people/plant interface
- Visibility of zones around hazards
- Improved incident response
- Behaviour insights to target intervention
- Improved Lone Worker Safety

Security

- Visibility of people - know who is where, in real-time
- The ability to replay activity
- Creation of zones for security access
- Access Management
- Provision of competency-based access

Productivity & Efficiency

- Understand work patterns
- Provision of information for resource allocation
- Ensure critical path focus
- Understand how and where teams operate

Protecting the environment

- Ensure protected species remain undisturbed
- Compliance to legislation around invasive species
- Protect sensitive habitats
- Integration with environmental sensors

Why Work with Onwave?

Solution focussed approach

Dedicated Operations and account management teams

In-house teams and experts

Industry knowledge and technical expertise

Fully owned technology hardware and software IP

Our People

Our combined 60 years of experience helps us to provide solutions and support better aligned to customer requirements.

Stuart Ladbrook
CEO

Stuart has over 20 years prior experience in leading, managing and delivering complex technical, construction, rail and signalling projects having previously senior positions at Mouchel and Thales.

Jay Moorhouse
COO

Jay is a Chartered Civil Engineer and has delivered major infrastructure projects in a variety of sectors including Highways, Water, Energy, Maritime and Nuclear.

Simon Romp
CTO

Simon brings over 20 years' experience in designing and implementing performance and resilient software both on premise and in the cloud.
